## Professional Overview

Final-year Electronics and Telecommunication (ENTC) Engineering student with strong fundamentals in automotive electronics, embedded systems, and sensor interfacing. Hands-on experience with microcontrollers such as ESP32 and Arduino, real-time data acquisition and hardware–software integration. Worked on projects involving vehicle monitoring, avionics systems, and sensor-based safety applications, with a keen interest in manufacturing-oriented automotive systems and quality-driven engineering.

## Skills

Languages : C, Python, Java, HTML, CSS  
Embedded & IoT : ESP32, Arduino Uno, Sensors  
Tools & Platforms : VS Code, PyCharm, GitHub, KiCad, Wokwi  
Additional : After Effects, Figma, Blender, CapCut

## Education

|                                                    |            |
|----------------------------------------------------|------------|
| <b>B.E. in Electronics &amp; Telecommunication</b> | 2022–2026  |
| SVPM College of Engineering, Baramati (SPPU)       | CGPA: 7.46 |
| <b>Higher Secondary Certificate (HSC)</b>          | 2022       |
| Creative Science Academy, Baramati                 | 89.00%     |
| <b>Secondary School Certificate (SSC)</b>          | 2020       |
| St. Ann's English Medium School and Junior College | 90.00%     |

## Projects

### IoT-Based Cattle Health Monitoring System

- Built an IoT-based cattle health monitoring system using ESP32 and motion sensors for activity tracking.
- Implemented real-time data acquisition and visualization using Python for health analysis.

### Rocket Parachute Deployment and Avionics System

- Designed a microcontroller-based avionics system for reliable parachute deployment in high-power rockets.
- Implemented sensor-triggered control logic to ensure safe deployment during descent.

### Real-Time Vehicle Monitoring System

- Designed a connected vehicle monitoring system to track speed and engine temperature in real time.
- Simulated an ECU using ESP32 in virtual to process vehicle parameters and upload data to Realtime Database.

## Certifications

- Embedded Systems - Emertex (Certified)
- Java Bootcamp – LetsUpgrade (Certified)
- Python Bootcamp – LetsUpgrade (Certified)
- Embedded and IOT – NPTEL (IIT Certified)
- Full-Stack Development(Online) – Apna College

## Achievements & Activities

- Founding member and Technical Head of the SVPM Innovation Club at SVPM College of Engineering.
- Participated in University-level hackathons and technical innovation events.
- Selected for All India Space Project Presentation(Event) at GMRT Station, India.
